Job Title

ShiftActivityLogHeader - Daily-Per-Shift-Lead-Role-ISS APP DEV

Job Description

Job Properties

This section lists the properties for this job.

Web application: ISS APP DEV

Last run time: 7/11/2017 5:50 AM

Recurring Schedule

Use this section to modify the schedule specifying when the timer job will run. Daily, weekly, and monthly schedules also include a window of execution. The timer service will pick a random time within this interval to begin executing the job on each applicable server. This feature is appropriate for high-load jobs which run on multiple servers on the farm. Running this type of job on all the servers simultaneously might place an unreasonable load on the farm. To specify an exact starting time, set the beginning and ending times of the interval to the same value.

This timer job is scheduled to run:

☐ Minutes Starting every day between 5 AM and 00

☐ Hourly

☒ Daily 7 AM and 00

☐ Weekly

☐ Monthly
